Issues for discussion include:

- *Changing attitudes to using data for new and innovative purposes;*
- *Organizations' ambitions to use data for good;*

- *Key data privacy opportunities and challenges highlighted by the pandemic (especially as it pertains to enabling public health while ensuring responsible use of data and trust);*
- *The role of organizational accountability to tackle the challenges and realize the opportunities;*
- *The evolving dual role of DPAs to both protect privacy and facilitate effective data use for good and innovation (do privacy regulators see themselves as having this dual role?);*
- *Shifting regulatory priorities and approaches to enforcement;*
- *Efforts for global regulatory coordination and convergence;*
- *Impact of the COVID-19 experience and learnings for data protection and data use in the post-COVID world;*
- *Have our data protection laws passed the COVID-19 “stress test”?*
