Lessons Learned – GPA Covid 19 Working Group on Regulatory Capacity Building

Presented by Lori Baker and Paul Vane

Version: 2.4

24 August, 2021

Section 01

Lessons Learned Survey

Who was involved?

What did we ask?

What can we do better?

Who was involved?

<u>Survey</u> was sent to...

Non-DP regulators all around the world

Businesses and organizations impacted by Covid data collection requirements

Options for regulatory capacity building within the specific context emergency regulatory response

What did we ask?

Main Thematic Areas Reviewed in the Survey

- Communications and guidance
- ✓ Organizational / operational impact of Covid 19 restrictions on data subjects' rights
- ✓ Sharing, Security and breach reporting
- ✓ Privacy Tech / IT Development, framework and design
- ✓ Supervision and Enforcement

What can we do better?

Where more information is collected and processed, risk increases, and additional work must be done to understand new and innovative ways of protecting privacy as well as the risks involved. Ethics becomes even more important, and we as regulators must continue to ask ourselves what we are learning along the way, are we addressing the appropriate issues, and what practically can be done.

Coordinated, cross-disciplinary guidance is needed from DPAs

Regulators should push entities to prioritize policy and procedural reviews due to the increase in a specific type of data collection, i.e., health data

Government data sharing policies, procedures and contractual clauses, both general and COVID-19 specific, could be developed to address sharing sensitive data with other authorities

Informational fact sheets and other clear, understandable templates and tools may be developed about incorporating PET, privacy engineering and innovative ways to better protect specific data types

Regulators should provide clear starting points and specific guidance as subject matter experts calling on people with perhaps less expertise to make some very difficult calls

Developing a better understanding of the impact of data management and sharing through COVID-19-specific privacy notices and risk assessments, as well as clear breach reporting requirements difc.ae

Jersey's response to the Covid-19 Pandemic

Paul Vane Information Commissioner

Milestones

Jersey Covid-19 statistics:

Jersey Covid-19 Vaccination Programme:

Age band	Number of first dose vaccinations	Percentage of population vaccinated (first dose)	Number of second dose vaccinations	Percentage of population vaccinated (second dose)
80+ years	5,460	100%	5,314	100%
75-79 years	3,349	100%	3,301	100%
70-74 years	4,665	99%	4,600	97%
65-69 years	5,091	94%	5,032	93%
60-64 years	6,478	100%	6,364	98%
55-59 years	7,679	98%	7,505	96%
50-54 years	7,773	92%	7,536	89%
40-49 years	13,118	85%	12,45 <mark>4</mark>	81%
30-39 years	11,160	74%	10,057	67%
18-29 years	9,893	64%	7,764	50%
17 years and under*	233	10%	70	3%

Issues faced:

- Track and trace Inbound travel/hospitality/retail.
- Personal data collected and accessed by volunteer workers.
- Working from home data security.
- Human resources and employment.
- Video conferencing.
- Data sharing with public bodies.
- Contact tracing App.

Contact Tracing App:

Latest update

1,815 Users have received an alert

58,092 App users since launch

Impact on the Jersey Data Protection Authority:

- The need to be agile in responding to public concerns.
- Early engagement with Government track and trace initiatives.
- Much time and resource spent reviewing DPIAs.
- Suite of guidance developed to assist public and industry.
- Own challenges of working from home.

Resource Room

Everything
Only for Organisations
Only for Individuals

Home > Resource Room > DP, Covid-19 & Contact-Tracing

Our primary concern is for the safety and security of the people of Jersey. Our skilled team is on hand to support Islanders with any guidance needed around compliance with data protection requirements.

Contact-Tracing Checklist

In assisting with the Government of Jersey's contact-tracing efforts, organisations must remember to comply with the Data Protection (Jersey) Law 2018 (the Law),

5 Messages about Transparency, Data Protection & Statistics

"The DPJL permits processing (including disclosure) of personal data in cases where it is deemed necessary for the protection of public health so long as there are appropriate safeguards in place to protect the rights and freedoms of data subjects."

Guidance for ALL existing and new volunteers

To help volunteers assist Jersey's vulnerable community we are giving a few headline key personal information tips which must be followed.

Data Protection & Coronavirus: FAQs

a

We know that some of you have had to adapt the way you work and may be working from home. Some of you might need to gather and share information urgently.

Data Protection and Video Conferencing: Tips for Individuals

Concerns have been raised about how to use these technologies in a way that is safe and secure, and ensures an adequate standard of data protection. Read our tips to help individuals.

Data Protection and Video Conferencing: Tips for Organisations

Concerns have been raised about how to use these technologies in a way that is safe and secure, and ensures an adequate standard of data. protection. Read our tips for organisations.

Health Data Sharing

GPA Covid-19 Working Group

- Contact tracing
- Covid track and trace mechanisms
- Home working
- Data sharing (health data collection)
- Compendium of Best Practices
- Vaccination Passports
- Discrimination How are individuals impacted?
- Ethical and trustworthy data sharing
- Greater collaboration
- Children's data and e-learning
